

FUAD AHMED (TUBA, FUAD AHMED)

Candidate for Yenching Academy Fellowship • Peking University

📍 Kolfe Keraniyo Sub City, Addis Ababa, Ethiopia • ✉ fuadahmedt@gmail.com • 📞 +251 925 278 350 • 🌐 github.com/fuad745 • 🔗 linkedin.com/in/fuad-ahmed-tech

🎯 CANDIDATE PROFILE

Software systems engineer and researcher with 4+ years of professional backend, distributed data architecture, and digital infrastructure experience in East Africa. Holds an accredited Bachelor of Science in Computer Science from St. Mary's University (GPA: 3.20/4.00, 100% English MOI). Seeking the Yenching Academy Fellowship at Peking University to investigate Sino-African digital infrastructure partnerships, technological sovereignty, and cloud governance.

🎓 HIGHER EDUCATION

Bachelor of Science (BSc) in Computer Science

Oct 2018 – Aug 2022

Faculty of Informatics, St. Mary's University — Addis Ababa, Ethiopia (Accredited by HERQA)

- **Academic Standing:** Cumulative GPA: **3.20 / 4.00** (~80% academic equivalent, Upper Division).
- **Medium of Instruction:** 100% English. Official English Medium of Instruction (MOI) Certificate issued by University Registrar.
- **Key Coursework:** Distributed Systems, Computer Networks & Communications, Operating Systems, Database Management Systems, System Analysis and Design, Discrete Mathematics, Linear Algebra, Probability & Statistics.
- **Capstone Thesis:** *Design and Implementation of a High-Concurrency Fault-Tolerant Distributed Data Synchronization Protocol* (Grade: A).

👛 PROFESSIONAL EXPERIENCE

Lead Backend & Distributed Systems Engineer

2022 – Present

Enterprise Technology Solutions & Independent Consultancy — Addis Ababa, Ethiopia

- Architected microservices handling high concurrent workloads using Python (FastAPI/AsyncIO), Go, and Node.js across East African digital systems.
- Engineered distributed caching topologies utilizing Redis clusters, reducing primary database load by 48% and mitigating tail read latency.
- Designed event-driven message architectures utilizing Kafka and RabbitMQ to decouple asynchronous processing pipelines during volatile traffic periods.
- Containerized heterogeneous microservices with Docker and orchestrated deployment topologies on Linux environments, optimizing compute resource density and power utilization.

Software Systems Engineer

2020 – 2022

Full-Stack & Systems Development — Addis Ababa, Ethiopia

- Developed transactional relational database schemas and indexed query execution plans on PostgreSQL and MySQL for commercial platforms.
- Implemented secure authentication, authorization, and cryptographic token lifecycles (OAuth2/JWT) across distributed client-server APIs.
- Configured Linux server environments, systemd daemon automations, firewall policies, and automated CI/CD pipelines with Git.

💻 COMPETENCIES & RESEARCH DOMAINS

Research Areas:	Sino-African Digital Partnerships, Cloud Data Sovereignty, Telecommunications Infrastructure, Digital Silk Road Governance, ICT Policy in Africa.
Technical Systems:	Distributed Systems, Microservices, Network Protocols (TCP/IP), Redis Caching, Linux Systems Administration, Docker Containerization.
Languages & Tools:	Python, Go (Golang), Java, SQL, Git, Linux/Bash.

LANGUAGES & REFEREES

- **English:** Fluent / Full Professional & Academic Proficiency (Official St. Mary's English MOI Certificate).
- **Chinese (Mandarin):** Beginner (Introductory self-study in Pinyin and basic vocabulary).
- **Amharic & Afaan Oromo:** Native / Bilingual proficiency.
- **Referees:** 1. **Dr. Tesfaye Assefa** — Assistant Professor, Faculty of Informatics, St. Mary's University. 2. **Mr. Birhanu Getachew** — Senior Lecturer & Capstone Advisor, Department of Computer Science, St. Mary's University.
