Date: October 15, 2026

To: The Graduate Admissions Committee & Chinese Scholarship Council (CSC)

Application Cycle: Academic Year 2026 / 2027

SUBJECT: Academic Recommendation for Mr. Fuad Ahmed (Master of Science in Computer Science)

Dear Members of the Admissions Committee,

It is my distinct pleasure to write this letter of academic recommendation in strongest support of **Mr. Fuad Ahmed** for admission to the Master of Science degree program in Computer Science and Technology under the Chinese Government Scholarship (CSC Type B) or University Fellowship.

I am an Associate Professor / Senior Lecturer in the Department of Computer Science at St. Mary's University. I have known Fuad for over three years during his undergraduate studies, where I instructed him in advanced modules including *Advanced Database Systems*, *Operating Systems*, and *Advanced Object-Oriented Programming*, and supervised his senior software assessments.

Throughout his undergraduate tenure, Fuad consistently stood out as one of the most disciplined and intellectually rigorous students in his cohort. He graduated with a strong **Major Cumulative GPA of 3.20 / 4.00**, earning top grades (**A/A+**) across core computational theory, system architecture, and database engineering. What distinguished Fuad was not merely examination excellence, but his deep conceptual curiosity and systematic approach to software engineering.

In laboratory assessments, Fuad demonstrated exceptional capability in relational database internals, transaction semantics, and algorithmic optimization. While peers struggled with race conditions and concurrency bottlenecks, Fuad independently researched and implemented atomic locking mechanisms (pessimistic row-locking with transactional boundaries) to preserve absolute ledger consistency. His capstone work mirrored this high standard, earning highest departmental marks for modular design, clean separation of concerns, and robust error handling.

Beyond coursework, Fuad expanded his competencies into mobile applications (Flutter/Dart) and scalable backend services. He communicates technical ideas with clarity, maturity, and intellectual humility. I give **Mr. Fuad Ahmed my highest and unreserved recommendation** for admission and scholarship award.

Sincerely,

[Professor's Full Name]

Associate Professor / Senior Lecturer
