

FUAD AHMED TUBA

Senior Software & Systems Engineer | Tech Community Leader

Addis Ababa, Ethiopia • +251 925 278 350 • fffuad1974@gmail.com

PROFESSIONAL PROFILE

Results-driven Computer Science graduate and Senior Software & Systems Engineer with strong expertise in **full-stack software architecture, UNIX/Linux systems administration, enterprise database design, and network infrastructure**. Currently leading technical development at **Aduutech**, architecting secure web applications and directing corporate cloud/LAN systems. Demonstrated commitment to technology democratization and social impact, having completed two continuous years of voluntary, pro bono IT and network maintenance for the **Kolfe Keranio Sub-City Administration (Woreda 07 Education Office)**. Holds formal executive training in capital markets infrastructure from Addis Ababa University. Seeking to engage with global Black tech innovators, executives, and mentors at **BFUTR Global Tech Summit 2026** to accelerate software engineering leadership and foster tech ecosystem growth in East Africa.

CORE COMPETENCIES & TECHNICAL PROFICIENCIES

- **Software Engineering & Web Development:** Object-Oriented Programming (Java, C++, Python), Rapid Application Development, RESTful APIs, Full-Stack Architecture, Secure SDLC, OWASP Top 10 Mitigation.
- **Systems & Network Administration:** UNIX/Linux System Administration, Shell Scripting, Network Infrastructure Deployment (LAN/WLAN), Routing & Switching, Firewall Configuration, POSIX Security.
- **Database & Data Engineering:** Relational Database Design (SQL/PostgreSQL/MySQL), Schema Normalization, Advanced Database Systems, ACID Compliance, Role-Based Access Control (RBAC).
- **Financial & Capital Market Systems:** Capital Markets & Securities Analysis, Electronic Trading Infrastructure, Transaction Integrity.
- **Community Leadership & Volunteering:** Public sector IT maintenance, educational technology empowerment, non-profit community technical support, technical mentoring.

PROFESSIONAL EXPERIENCE

Aduutech — Addis Ababa, Ethiopia

Senior Software & Systems Engineer / Technical Operations Lead | February 2023 – Present

- Direct software architecture, full-stack application development, and technological operations for corporate client projects.
- Architect and deploy enterprise-grade web applications utilizing modular object-oriented patterns, secure RESTful APIs, and modern responsive front-end frameworks.
- Configure SSL/TLS security certificates, strict input validation, and parameterized database queries, thwarting OWASP vulnerabilities (SQL Injection, XSS, CSRF).
- Oversee enterprise Local Area Networks (LAN), cloud hosting environments, and access control policies, ensuring 99.9% uptime and robust operational security.
- Enforce rigorous data confidentiality, encryption standards (at rest and in transit), and authentication protocols adhering to international data protection practices.

- Lead automated CI/CD deployment pipelines, code review auditing, and comprehensive disaster recovery backup procedures.
- Mentor and guide junior engineering talent in defensive coding standards, API architecture, and operational systems management.

Woreda 07 Education Office (Kolfe Keranio Sub-City) — Addis Ababa, Ethiopia

Volunteer IT Systems & Network Specialist | *September 2024 – Present (2 Years Service)*

- Volunteered 100% free of charge (*pro bono publico*) to maintain, repair, and service IT systems across local government education bureaus and public schools.
- Diagnosed, upgraded, and repaired over 40 desktop computers, workstations, and laptops for education administrators, supervisors, and teachers.
- Designed and deployed local area network (LAN) cabling, switch connections, and Wi-Fi access points, ensuring uninterrupted connectivity to educational databases.
- Implemented structured offline backup protocols for official student registry archives and national examination records.

Ministry of Revenue (Federal Government of Ethiopia) — Addis Ababa, Ethiopia

Database Designer / Engineering Intern | *October 2021 – November 2021*

- Selected for a competitive technical internship at the federal revenue authority, contributing directly to the Taxpayer Agent Management System.
- Architected normalized relational database schemas, entity-relationship diagrams (ERDs), and automated data integrity triggers for high-volume transactions.
- Formulated granular Role-Based Access Control (RBAC) matrices to ensure sensitive taxpayer records were accessible only by authenticated personnel.

EDUCATION & CREDENTIALS

St. Mary's University — Addis Ababa, Ethiopia

Bachelor of Science (B.Sc.) in Computer Science | *Graduated: July 2022*

- **Cumulative GPA:** 3.04 / 4.00 | **Major Field GPA:** 3.20 / 4.00
- **Capstone Honors:** Senior Project I (Grade: **A**), Senior Project II (Grade: **A+**)
- **Core Coursework:** Network & System Administration (**A**), UNIX System Administration (**A-**), Advanced Database Systems (**A**), Advanced OOP (**A+**), Software Project Management (**A**), Internet Programming I & II (**A, A**), Rapid App Development (**A**).

Addis Ababa University – School of Commerce — Addis Ababa, Ethiopia

Certificate: Fundamentals of Capital Markets & Securities Analysis | *September 2024*

- 50 hours of intensive training in financial market mechanisms, securities trading, and regulatory governance (Cert #43504).

LANGUAGES

- **English:** Fluent (Full professional and academic proficiency; language of university instruction)
- **Amharic:** Native
- **Oromiffa (Afaan Oromoo):** Professional working proficiency
